4 The "S" shaped moulded crimp seal

The effective way to use security crimp seal

NATIONAL 8" Double Locking Security PLATE SEAL

National 8" Double Locking Security Plate Seal is a tamper proof, thermoplastic moulded device which has the advantage of a non-corrosive security seal and no sharp edges that may cut hands. It comes in a standard range of 7 brilliant colours to facilitate colour coding for batch production, stock rotation or depot identification, etc.

In order to prevent duplication, consecutive serial numbering is closely monitored within our organisation. This is done by marking the plate seal with gold foil which can include customer's name and/or logo.

National 8" Double Locking Security Plate Seal is most secured for use in containers, oil tankers, hospitals, depots, warehouses, etc.

Minimum order quantity for own name is 50,000 pcs.

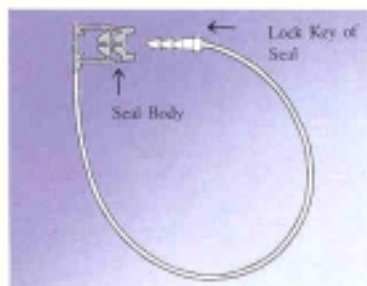

National 8" Double-Locking Security Plate Seal comes in 7 brilliant colours of your choice.
